

SOFTWARE DEVELOPER

Siem van Bree

PROFILE

Motivated Software Developer in training with a passion for technology and programming. Focused on creating user-friendly and efficient software solutions. Experienced in both independent work and teamwork. Participated in hackathons to develop practical solutions and gain experience in challenging projects.

PROJECTS

PROJECT: C# WPF SQLITE - FICTIONAL PATIENT RECORD (SUMMA ZORG)

Fictional Patient Record - Developed a C# WPF application with SQLite alongside two fellow students to manage fictional patient records.

The application includes:

- Record management with multilingual support and dark/light mode
- PDF export functionality
- 3D visualization of the human body

Responsible for project management, team coordination, and communication. The application is currently used as teaching material at Summa Zorg & Welzijn.

C#, WPF, SQLite, PDF Export, XAML
